

Highway High Speed Barrier Gate

SPECIFICATION

- 1 . Power supply:AC220V±10%50HZ
- 2 . Working temperature:-40°C~85°C
- 3 . Rated power:70W/150W
- 4 . Relative humidity:≥90%
- 5 . Shell Material:A3 steel
- 6 . Running time: 1.2s, 3s, 6s

AUTO MATIV TRAFFIC BARRIER GATE BG8004

- 1) Manual release
- 2) Machine core with compression spring, effectively avoids the accidents caused by spring breaking
- 3) Die-casting aluminum alloy motor, precision and good at thermal radiating
- 4) Motor cooling fan, solving the problem of heat-protection
- 5) Double safety limit switches (photoelectricity limit switch/motor memory sensor)
- 6) Reversing on obstacle
- 7) Auto-closing
- 8) Support the INFRARER PHTOCELL for anti-bumping function (optional)
- 9) Support the external and internal VEHICLE LOOP DETECTOR (optional)
- 10) Traffic light interface
- 11) Wire control (switch signal)/ Remote control (418MHZ)
- 12) RS485 communication module (optional)
